Capital Improvement Program

City of Council Bluffs

Fiscal Year 2006-07 through 2010-11

September 26, 2005

RESOLUTION NO 05-268

A RESOLUTION APPROVING THE CAPITAL IMPROVEMENT PROGRAM FOR FISCAL YEARS 2006-07 THROUGH 2010-11.

the City annually prepares and adopts a Capital Improvement Program which establishes projects to be undertaken during the next fiscal year and proposes projects for the balance of a five-year period; and WHEREAS.

the Capital Improvement Program is the primary method of implementing the goals and policies contained in the Comprehensive Plan; and WHEREAS,

WHEREAS, a Capital Improvement Program has been prepared for the Mayor's submission

to City Council; and

the City Planning Commission has reviewed the FY 2006-07 through 2010-11 Capital Improvement Program as submitted by the Mayor and recommends adoption by the City Council; and WHEREAS.

WHEREAS, after study and consideration, it is the belief of this City Council that approval of the Capital Improvement Program for FY 2006-07 through 2010-11 is in the best interest of the City of Council Bluffs, Iowa.

NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF COUNCIL BLUFFS, IOWA

That the Capital Improvement Program for FY 2006-07 through 2010-11, attached hereto and make a part by reference, is hereby approved by the City Council of Council Bluffs, Iowa,

ADOPTED

AND

Mayor

Hanafan,

ATTEST:

Cheryl Punteney

SECTION I - INTRODUCTION

I. INTRODUCTION

1. PURPOSE OF THE CAPITAL IMPROVEMENT PROGRAM

Capital facilities decisions represent some of the most significant policy choices made by the City of Council Bluffs. Virtually all departments within the City face the need for capital facilities. These include new or expanded projects, repair or replacement of existing physical facilities, land acquisitions, elimination of physical hazards in the community, or the construction of new facilities such as parks, playgrounds, fire stations, water or sewer systems, streets, traffic signals, etc.

Capital improvement programming and budgeting involves the development of a long-term plan for capital expenditures for the City. Capital expenditures include expenditures for buildings, land, major equipment, and other commodities, which are of significant value and have a useful life of more than several years.

The Capital Improvements Program (CIP) lists each proposed capital item to be undertaken, the year in which it will be started, the amount expected to be expended in each year, and the proposed method of financing these expenditures. Based on these details, summaries of capital activity in each year can be prepared as well as summaries of financial requirements, such as amounts of general obligation bonds to be issued or amount of general operating funds required.

The CIP identified the City's most critical capital improvement needs and the general policies under which decisions are made. The CIP was developed for the following purposes:

- to address and prioritize the City's improvement needs in a comprehensive manner;
- to permit careful consideration, design, and scheduling of individual projects through advanced planning;
- to allow for financial planning over a long period; and
- to provide continuity in improvement programs with changes in City Council and staff.

The development of a CIP is the process of deciding what capital projects should be built, when they should be built, and how they will be financed. In its simplest form, a CIP is a listing of improvement projects by priority, including a cost estimate and funding source. The adoption of the CIP by the City Council does not by itself guarantee or commit the City to a given set of projects. Major improvement projects are authorized on an individual basis in accordance with state laws and municipal ordinances. However, the plan does provide the City Council with a framework upon which to base improvement decisions, provides the City staff with direction as to its work effort, and provides the citizens with information about the City's future intentions. The latter is particularly important because of the impact public facilities can have on business and development decisions.

2. CAPITAL IMPROVEMENTS DEFINED

The term capital improvements normally refer to expenditures for capital items of relatively permanent nature, such as buildings or other attachments to land. Only improvements with an estimated cost in excess of \$50,000 are considered in this plan. Minor capital improvements, which occur from time to time, are best handled through the annual operating budgets. The CIP deals with improvements of a scale, which have to be planned on a long-term basis.

3. RELATIONSHIP TO OTHER PLANS AND DOCUMENTS

It is the function of the CIP to plan the construction of the community's physical facilities in a manner consistent with the City's overall goals. These goals are expressed in a number of different fashions, including the comprehensive plan, neighborhood plans, and many other less formal expressions of community policy. These goals established over the years, define the basic functions the City has decided to undertake, set minimum levels of service, and determine financing methods. It is the goal of this CIP to address the community's improvement needs in a manner consistent with these goals. More specifically, the goals of this process include establishing an improvement program which:

- defines a realistic level of financial resources which can be committed to the City's improvement needs;
- prioritized the City's need for allocation of limited resources;
- addresses the basic facility needs of the community in the most cost effective manner (basic service being defined as streets, sewers, drainage, and water);
- recognizes the role of the City facilities in the development process and the need for the City to make improvements which promote the economic stability and orderly growth of the community;
- recognizes the total scope of City services and allocates a portion of the City resources to those amenities which improve the quality of life and public safety; and
- encourages acquisition of outside funding to supplement City resources.

II. CAPITAL IMPROVEMENT PROGRAM PROCESS

II. CAPITAL IMPROVEMENT PROGRAM GOALS

1. OVERALL GOAL OF CIP

The primary goal and policies to direct future infrastructure and public facility developments Council Bluffs are as follows:

Goal - Plan, program, and implement the most effective, safe and cost efficient infrastructure and public facilities system possible for the community.

Policies:

- Annually prepare and adopt a five-year capital improvements program, which is consistent with the goals and policies of the 1994 Comprehensive Plan.
- Recognize the need for and improve on intergovernmental and regional cooperation in order to reduce duplication of effort and avoid public inconvenience.

2. CIP CATEGORICAL GOALS

Four specific categories were identified by the Comprehensive Plan relating to capital improvements. These include quality of life, public safety, utilities and transportation. The goals, policies and capital improvement efforts by category are outlined as follows:

a. Quality of life

Goal - Provide for the equitable distribution of community facilities to meet the cultural, educational, social, and recreational needs of the community.

Policy - Provide sufficient resources to maintain and develop appropriate recreational, cultural, and leisure activities.

Capital Improvement Efforts

- Continue to plan, improve, and enhance the existing parks and recreation, aquatics, golf, historical and service delivery facilities.
- Implement the Parks System and Recreation Facilities Master Plan.
- Continue to develop the Council Bluffs Recreation Complex.
- Acquire, plan and develop new park and recreational facilities in development areas and in areas, which have insufficient park and recreational opportunities.

- Acquisition of portions of the Loess Hills which preserve the area's natural heritage or serve as an expansion to existing park and recreation facilities.
- Implement the Council Bluffs Recreational Trail and Bikeway Master Plan.

Policy - Promote a social and cultural environment that provides an opportunity for all residents.

Capital Improvement Efforts

• Undertake accessibility improvements necessary to comply with the Americans with Disabilities Act.

b. Public Safety

Goal - Provide for the equitable distribution of community facilities to meet the public safety and health needs of the community.

Policy - Provide adequate public health safety and crime prevention systems in Council Bluffs.

Capital Improvement Efforts

- Plan for and provide for future facilities for the Police Department that take into account city and department growth.
- Plan for and provide for future technology issues in records management, crime analysis, computer-aided dispatch and other areas that will assist the law enforcement mission in Council Bluffs.
- Continue the program to upgrade and maintain current Fire Department facilities to plan and provide future facilities in locations that will ensure service coverage of future City growth.
- Maintain a program to plan and purchase Fire Department equipment to ensure current and future levels of service and take advantage of technological advances.
- Install and maintain a traffic preemption system on the primary city streets to provide for controlled response of emergency vehicles.
- Maintain the City's Severe Weather Early Warning System and expand the coverage of the system to meet City growth.

c. Utilities

Goals - Provide adequate, efficient, and appropriate public utilities and services to existing and future residential, commercial, and industrial areas.

Policy - Provide facilities and services to comply with State and Federal regulations; to expand services in a cost effective manner; to proactively preserve and upgrade existing infrastructure.

Capital Improvement Efforts

- Expand the City's sanitary sewer treatment facilities and pump stations to current environmental standards and to allow for additional residential and business development in the community.
- Improve the current sanitary sewer and storm water infrastructure within the community to preserve existing development and to encourage redevelopment of existing residential, commercial, and industrial areas.
- Extend sanitary sewer to encourage new residential, commercial, and industrial development within or adjacent to the community.
- Maintain and improve existing public facilities and develop new facilities based upon need.

d. Transportation

Goal - Provide a transportation system throughout the City for the safe and efficient movement of people, goods, and services.

Policy - Coordinate transportation planning and improvements with the planning and development of other elements of the community, including other transportation means, public utilities, community facilities, and commercial and industrial areas; to proactively preserve and upgrade existing infrastructure.

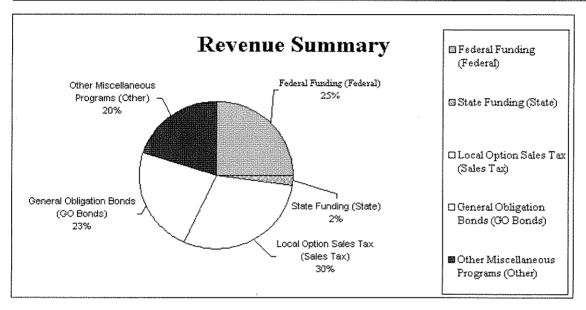

Capital Improvement Efforts

- Continue a program of pavement resurfacing which extends the service life of existing streets.
- Improve the current street system within the community through reconstruction, combined with other utility improvements, to preserve existing development and to encourage the redevelopment of residential, commercial, and industrial areas.
- Construct street extensions or reconstruct streets, which will result in new residential, commercial, or industrial development.
- Implement the recommendations contained in the Mid-City Neighborhood Strategy Area Plan.

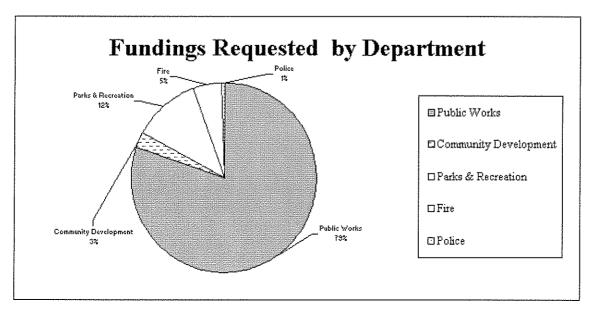

III. FIVE YEAR CIP REVENUE SUMMARY

COUNCIL BLUFFS CIP PROJECTS 2010-2011

APPENDIX A SIGNIFICANT PROJECTS NOT INCLUDED

Capital Improvements Program Projects Not Scheduled

The City does not have the financial capability to address all the improvements which were identified in the CIP process. Some of the most significant projects which are not included in the CIP are listed below. This list is not intended to indicate all the projects which were proposed and not funded, but to make special note of those improvements which have been identified as significant community needs.

- 1. North Loop Transportation Corridor The Loess Hills on the north edge of the city makes east-west travel difficult. A new roadway would facilitate travel and reduce traffic on existing streets, which are mostly narrow residential streets.
 - a. N. 16th Street to N. 8th Street Connector
 - b. N. 8th Street to North Broadway Connector
 - c. N. Broadway to IA 191 Connector
 - d. N. 8th Street Improvements Parkwild to Delong
 - e. IA 191 Improvements
- 2. Mosquito Creek Transportation Corridor The creek and Loess Hills have created a barrier to transportation needs in the east edge of the city. Improvements would accommodate existing traffic needs as well as promote and encourage growth to the city.
 - a. Franklin Avenue Bridge over Mosquito Creek
 - b. Woodbury Avenue Bridge over Mosquito Creek
 - c. Indian Hills Road Improvements
- 3. South Expressway Corridor Development Program Potential for commercial, industrial, and retail growth exists along this corridor. The City can encourage this growth by providing infrastructure improvements. This improvement would include a new street from 35th Avenue/South Expressway intersection east-southeast to Highway 92/275.
- 4. Extension of 23rd Avenue east of the South Expressway and south to 29th Avenue. Included would be improvements to railroad crossing at South Expressway and 29th Avenue.
- 5. Extension of North 37th Street and Service Road B to West Broadway and North 36th Street interchange.
- 6. Reconstruction of Jim, Helen, Lee, Dorothy, Becky, Bonneville, and Lynwood Drives.
- 7. Reconstruction and possible relocation of Indian Creek flood channel.
- 8. Mid-city railroad consolidation and relocation.
- 9. Connector road between Richard Downing Boulevard and South Omaha Bridge Road west of Twin City.
- 10. Public Works maintenance garage and facilities.
- 11. New Police headquarters.

- 12. City and County radio system.
- 17.City Hall rehabilitation.
- 18. East Beltway.
- 19. 23rd Avenue widening 16th Street to South Expressway.
- 20. 9th Avenue Viaduct.
- 21. Little Pony Creek sanitary sewer.
- 22. Renovation of Fairmount Park.
- 23. Completion of the Council Bluffs Recreation Complex Master Plan Additional fields and facilities.
- 24. Renovation and Infrastructure repairs at the following parks Roberts, Big Lake, Valley View, and Manawa North Shore.
- 25. Renovation Westwood Golf Complex.
- 26. Riverfront Park Development.
- 27. City Community Recreation Center.
- 28. Park land acquisition.
- 29. Development of new neighborhood and community parks as designated in the 2000 Park System Master Plan.
- 30. Avenue A Park Development.
- 31. New Eastside Pool/Water Playground.
- 32. Trail System Expansion.
